

Offshore Energy Solutions

Protecting Your Asset's Operational Wellbeing

For demanding operations

Exploration

Drill rig down time is costly. Making sure your drilling assets operate profitably and safely for both workers and the environment is critical to your operations. Our chemical programs will keep your assets performing at peak levels in harsh, extreme conditions.

Production + Storage

Supporting offshore production facilities in the utility space and during topside operations; our programs will help ensure asset protection, lower operating costs, and environmental compliance.

Offshore Marine

Vessels that support offshore oil & gas assets demand performance, reliability, and cost-effectiveness. To protect against uninterrupted service, Drew's chemical programs improve vessel operations. Ask us what's new!

Solutions that deliver, especially when conditions don't

Corrosion + Water Management

Protect your fleet from corrosion and scale in boiler and cooling water systems, get fresh, clean, drinking water onboard, and drive proper management of water-related waste streams. We're experts in chemical water treatment and robust monitoring. We're here to help you manage your asset properly.

- Cooling and Boiler Water Treatment
- Fresh Water Generation and Potable Water Treatment
- Sewage, Oily Wastewater, and Ballast Water Treatment

Maintenance

Chemicals can be costly and hazardous if not used properly. We provide the tools needed to ensure simple and safe application of chemicals and cleaning processes, complete with dosage pumps, inline samplers, monitoring systems, and cleaning equipment.

- Compressed Gasses
- Chemical Dosage Metering Pumps
- Cleaning and Delivery Systems
- Engine Monitoring and Performance Equipment

Fuel Efficiency + Optimization

New regulations continue to impact the offshore energy industry's fuel types. These fuels provide challenges associated with microbiological growth, lubricity, compatibility, and combustion. Our complete line of fuel additives, fuel homogenization equipment, and onboard test kits, in addition to our IMO 2020 help desk, makes managing these fuel-related challenges easy.

- Fuel Chemical Treatments
- Fuel Homogenization Technologies
- Onboard Testing and Monitoring
- Industry Leading IMO 2020 Help Desk

Technical Knowledge

Asset productivity, systems protection, and environmental compliance remain top priorities throughout the energy extraction and production process. Our portfolio of technical products and services complement our chemical programs and allow users access to a complete Drew Energy Solution you can count on.

- Drew Watch
- Remote assistance for water treatment
- IMO 2020 fuel analyses, especially distillates
- Port harbor local service / sales

Safe, Healthy Operations

Keep living and accommodation spaces clean & sanitary, while reducing operational waste and environmental impact. Our CREW CARE® program provides a comprehensive cleaning program and contributes to ESG objectives with exceptional efficacy and supports ISO 14001 continuous improvement standards.

- Accomodation Space Cleaning and Disinfecting
- Galley Cleaning and Sanitation
- Floor Maintenance

New Build Success

Our integrated approach leads to fewer breakdowns, faster onboarding, and a safer vessel well before it leaves the yard.

- Technical Analysis
- Design Drawing Review
- Precommissioning Cleaning & Acceptance Plan
- Vessel Storage & Chemical Handling Plan
- Optimized Product Package
- Shipyard / Initial Service Inspection

5 Good Reasons to Choose Drew

A century of experience as THE EXPERTS in chemical technology for offshore assets and oceangoing vessels.

Dedicated specialists to support Oil & Gas in the US Gulf, South America, North Sea, SE Asia, and the Middle East.

Recent investments in our Global Innovation & Manufacturing Center of Excellence, totaling more than US \$10 million.

World-class logistics expertise, supporting 1200+ ports and terminals worldwide.

Customized 'solutions packages' and service log systems to simplify monitoring while extending asset life.

OUR VISION

Drew Marine is the most trusted brand and preferred global resource for marine solutions that enhance the longevity and operating efficiency of ocean vessels.

OUR MISSION

To sustain the superiority of the Drew Marine brand by bringing environmentally and technologically superior products and services for the benefit of vessel owners and operators while increasing shareholder value.
